PROFILE

Results-driven Software Engineer with 4 years of experience specializing in React.js and Next.js–based frontend development. Proven experience in building and maintaining large-scale real estate web applications, migrating legacy PHP systems to modern React/Next.js architecture, and improving SEO through Server-Side Rendering (SSR). Strong skills in reusable component development, performance optimization, bug fixing, and implementing new business modules. Experienced in collaborating with cross-functional teams to deliver scalable, production-ready applications.

PROFESSIONAL EXPERIENCE

Nurtur Tech India Pvt Ltd (Acquired Starberry Pvt Ltd), Coimbatore

Software Engineer – Frontend (React.js)

Nov 2022 – Present

- Developed and maintained 16+ responsive real estate websites using React.js, Next.js, Gatsby.js, and Strapi CMS.
- Migrated multiple client applications from PHP-based architecture to Next.js, improving code maintainability and scalability.
- Converted Client-Side Rendered (CSR) React pages to Server-Side Rendering (SSR) using Next.js, resulting in improved SEO and faster initial page loads.
- Implemented SEO best practices including meta tags, structured data, optimized routing, and SSR pages to improve organic search performance.
- Built reusable and modular React components to support rapid development across multiple projects.
- Implemented new business modules such as property listings, advanced search & filters, location-based listings, enquiry forms, and CMS-driven pages.
- Fixed production bugs and handled enhancement requests to improve application stability and user experience.
- Optimized application performance using lazy loading, code splitting, memoization, and image optimization, achieving up to 30% performance improvement.
- Integrated REST APIs including property data, Google Maps, authentication, and enquiry workflows.
- Collaborated with backend, QA, and design teams to deliver high-quality, production-ready solutions.
